

نحوه ایجاد Endpoint policy

برای ایجاد policy در کنسول ۱۰ Kaspersky Security Center در قسمت Manage device در تب Policies گزینه Create policy را انتخاب میکنیم.

در این مرحله ورژن Endpoint مد نظر را انتخاب میکنیم.

در این مرحله نام را تعیین میکنیم به عنوان مثال Protection Policy-KES^{۱۱} و در صورتی که ورژن قبل از ورژن فعلی وجود داشت میتوانید با زدن تیک Use Setting from policy for previous version of application تنظیمات آن را در این policy وارد نمایید.

← New Policy Wizard

Enter a group policy name

Name:

Kaspersky Endpoint Security for Windows (11.0.0)

Use settings from policy for previous version of application

Next Cancel

در این مرحله می توانید انتخاب کنید که policy با تنظیمات دیفالت ایجاد شود و یا هر گزینه را به صورت مجزا تنظیم کنید.

← New Policy Wizard

Policy creation mode

i Selecting a policy creation mode allows you to create a new policy faster.
If you select default settings, you only need to configure a list of trusted applications and decide on participation in KSN.

Create policy with default settings

Configure policy settings in the wizard:

- Import of settings
- Kaspersky Security Network Statement
- Configuration of protection settings
- Configuration of control settings
- Configuration of encryption settings
- Scan exclusions and trusted zone
- General settings
- Password protection

Next Cancel

در این مرحله استفاده از فضای ابری KSN را فعال کنید. Kaspersky Security Network (KSN) فضای ابری شرکت کسپرسکی است که در جهت سرعت بخشیدن به شناسایی ویروس های جدید به کار میرود.

← New Policy Wizard

Participation in Kaspersky Security Network

- ▶ Instant response to new threats
- ▶ High performance of protection components
- ▶ Decreased false positives rate

KASPERSKY SECURITY NETWORK (KSN) STATEMENT - Kaspersky Endpoint Security 11 for Windows

Kaspersky Security Network Statement (hereinafter "KSN Statement") relates to the computer program Kaspersky Endpoint Security (hereinafter "Software"). KSN Statement along with the End User License Agreement for Software, in particular in the Section "Conditions regarding Data Processing" specifies the conditions, responsibilities and procedures relating to transmission and processing of the data, indicated in the KSN Statement. Carefully read the terms of the KSN Statement, as well as all documents referred to in the KSN Statement, before accepting it.

When the End User activates the using of the KSN, the End User is fully responsible for ensuring that the processing of personal data of Data Subjects is lawful, particularly, within the meaning of Article 6 (1) (a) to (1) (f) of Regulation (EU) 2016/679 (General Data Protection Regulation, "GDPR") if Data Subject is in the European Union, or applicable laws on confidential information, personal data, data protection, or similar thereto.

در این مرحله لیست نرم افزارهایی که ممکن است در شبکه خود استفاده نمایید وجود دارد در صورت لز

The screenshot shows a 'New Policy Wizard' window with a close button (X) in the top right corner. The title bar reads 'New Policy Wizard'. Below the title bar is a back arrow and the text 'New Policy Wizard'. The main heading is 'Scan exclusions and trusted zone'. Below this heading is the instruction 'Use standard exclusions for the following applications:'. A list of applications is shown, each with a checked checkbox and a folder icon: RAdmin, Kaspersky Lab, MS Exclusions, UltraVNC, Symantec, Timbuktu Pro, and Dameware Mini Remote Control Application. The 'Dameware Mini Remote Control Application' entry is highlighted with a green background. Below the list are two more checkboxes, both checked: 'Create recommended scan exclusions for workstations' and 'Create recommended scan exclusions for file servers'. At the bottom right, there are two buttons: 'Next' and 'Cancel'.

در نهایت میتوانید انتخاب کنید که policy فعال یا غیر فعال و یا out of policy باشد گزینه out of policy را زمانی فعال میکنیم که نیاز به اعمال policy متفاوت برای لپ تاپ های خارج از سازمان دارید.

← New Policy Wizard

Create the group policy for the application

Click the Finish button to create Kaspersky Endpoint Security for Windows (11.0.0) and complete the Wizard.

Policy status:

- Active policy
- Inactive policy
- Out-of-office policy

Open policy properties immediately after they are created

Finish Cancel
